Magliner FAQ

1. What is the difference between a Magliner Mini, Magliner Junior and a Magliner Senior?

- a. The Magliner Senior's frame is 55 1/2" long versus the Magliner Junior's frame at 42 3/4" and the Magliner's Mini frame at 32 1/4". The longer the frame, the bigger the shelf you can use. You may use 24 or 18 inch wide shelves on the Magliner Junior and Senior. The Magliner Mini is only available with 18 inch wide shelves and a special 19 inch wide bottom shelf to be used with a Mac Pro/G5 computer tower.
- b. The Magliner Senior (Stock) uses a loading handle located beneath the frame, instead of the Magliner Junior's two push handles.

Note: The loading handle on the Magliner Senior (Stock) can only be used in the upright position, since it is located underneath the frame. There are no handles to push from when cart is in the 4-wheel mode.

The Magliner Senior (Stock) and Magliner Junior (Stock) carts use the same locking latch system to change the cart from upright mode to 4-wheels. They also have the same weight capacity and share all other parts such as axles, wheels, nose, and toe plate. Magliner Mini is not available in the stock version.

2. What is the difference between a Stock Magliner and a Modified Magliner?

The Magliner Stock models are not altered by Backstage in any way. These models come equipped with 5" stock wheels. (Brakes are optional), a Stock 30" Nose and their own locking latch folding system.

These carts are great if you work for FedEx or UPS and use them to carry boxes from point A to point B. But if you are going to start using your cart as a work station and to transport expensive equipment such as cameras, video or sound gear over rough terrain, grass or cables, then the cart needs to be reinforced and adapted to these needs.

The Magliner Modified version contains the following modifications/alterations.

- a. Nose is reinforced with additional rivets to allow the use of multiple shelves and accessories.
- b. Standard 5" wheels are replaced with our own 8" Wheel Conversion Kit. (pneumatics with brakes)
- c. Magliner's original folding system is replaced with our own.
- d. Axle is bored from 1/8" to 3/16" diameter and wheel cotter pins are replaced with safety quick release pins.
- e. Frame, Nose and U-Handle Bar are pre-drilled to allow user to adapt any of our accessories at a later time.
- f. Magliner Senior's U-Handle Bar is outfitted with push handles and the U-Handle Bar is shortened.

3. Are all accessories compatible between the Stock and Modified versions?

No, most accessories will work only with the modified versions. See product requirements.

4. Can the Magliner still be folded after it has been modified?

Yes, we have built a system so you can still fold your cart in the upright position.

5. How do you fold the modified Magliner

You must first loosen up the prongs that connect the U-Handle to the 8" Wheel Conversion Kit, put your cart in the upright position, insert and slide the U-Handle underneath the cart where it connects to a receiver attached to the bottom of the 8" Wheel Conversion Kit, lock in place with prongs.

Note: Narrow and Mini Wheel Conversion Kits do not have receivers underneath the cart due to their narrow size.

6. I already own a Stock Magliner, can it be modified or do I have to buy a whole new cart?

No, you can modify your existing cart or we can do it for you. We also repair and service Magliners.

7. Can I buy replacement parts for my Magliner such as tires, tubes, bearings, etc?

Yes, we are about the only retail store that keeps Magliner parts in inventory at all times.

8. I live outside of the United States, can you ship a Magliner to an international destination?

Yes, we sell a large number of Magliners and accessories outside the U.S., mostly to Europe, Asia and Canada.

9. How can I pay for a Magliner from abroad?

You may use a wire transfer service from your bank to ours (a fee of \$ 25.00 USD will be added to your order to cover bank fees at our end) or you may use a credit card such as VISA, Mastercard, Discover or American Express.

10. Can you take care of the shipping or do I have to arrange it?

We can take care of it. As soon as you give us the list of items you need, we will get a quote from a shipping agent the same day. We can ship to your location (door-to-door) or you can save some money if we ship it to your local international airport and you pick it up (door-to-airport).

Note: You will be responsible for all local custom fees, import fees and local taxes. Contact your customs office or customs broker in your particular country to know the fees that need to be paid. We don't have this information.

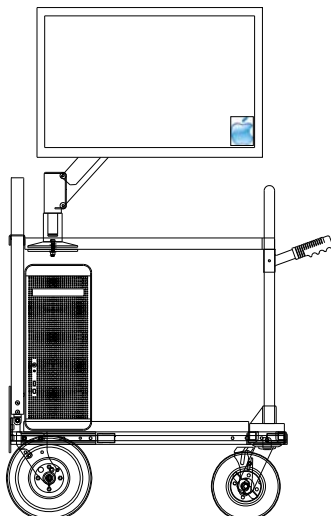

11. Is there any other costs on shipping I should be aware of?

Yes, the only other charge involved is a packing fee of 5% on all shipments where items need to be packed, labeled and documents prepared.

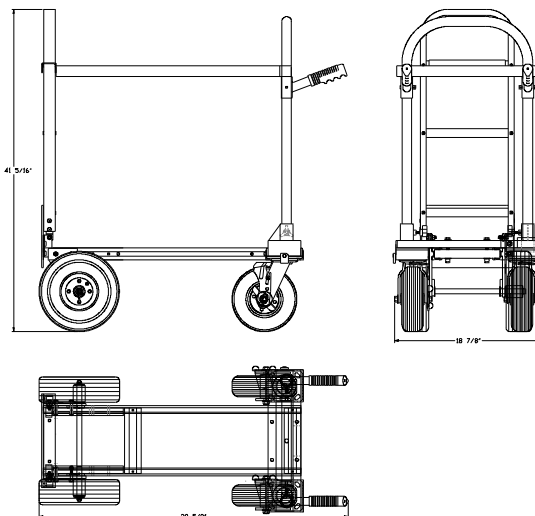

Magliner Mini

Magliner Mini shown with 8" Wheel Conversion Kit, Mag 30" HD Nose, Mag Mini 18" Top Shelf and Mag Mini 19" Bottom Shelf

Mag Mini Hydraulic Disc Brake

The Mag Hydraulic Brake system lets you have total control of your Magliner while in motion on any surface which is not leveled. The single brake handle controls both front wheels at the same time. The split-line hydraulic system provides even side-to-side braking for true linear descent, and the axle-less design prevents brake misalignment. The self-cleaning disc brakes provide consistent performance in all weather conditions. **Note: Hydraulic Brake System may only be installed by qualified Backstage technician.**

Part No: MAG-W HB MINI
Sale price: \$ 735.00
Material: Steel / Aluminum
Color: Black
Max. Capacity: 600 lbs.

Mag Junior (Stock) with Top, Middle & Bottom 18" Shelves

The Magliner Junior Cart is the most widely used handtruck in the equipment handling industry today. Converts easily from 2-4 wheels by use of a latch release mechanism. We at Backstage have created a number of accessories for this cart to be used in Film & Video production. All Backstage Stock Magliners are outfitted with frame safety locking pin to prevent frame from lifting on its own when used in the 4-wheel position.

Note: All Magliners sold by Backstage use split-rim design wheels with tubes. Wheels can be repaired if flat occurs. Beware of tubeless one-piece rims.

Mag Hydraulic Disc Brake

The Mag Hydraulic Brake system lets you have total control of your Magliner while in motion on any surface which is not leveled. The single brake handle controls both front wheels at the same time. The split-line hydraulic system provides even side-to-side braking for true linear descent, and the axle-less design prevents brake misalignment. The self-cleaning disc brakes provide consistent performance in all weather conditions. Brake Handle is easily removed (Magliner Junior only) for storage by using a Quick Release T-Aircraft Pin.

Note: Hydraulic Brake System may only be installed by qualified Backstage technician.

Mag Fluid Head Nose Mount Bracket

The Mag Fluid Head Nose Mount allows you to mount a Fluid Head on the Nose side of the cart, this will become very helpful when you need additional space and the ability to secure the unit, much more effective and safe than using a traditional Hi Hat or Low Hat. Mount may be mounted towards the inside or outside of Nose, height adjustment and removal can easily be done by loosening two hand prongs. Mount has universal hole pattern to allow you to install any of the following plates: Mitchell, Dove Tail, Euro Ball Plate 75mm, 100mm, 150mm, and Universal Star. Mag Grip/Light Caddy (Large)

Part No: MAG-I 24
Sale price: \$ 373.00
Material: Steel
Color: Black
Max. Capacity: 100 lbs.
Weight: 26 lbs.
Dimensions: D11" x W27" x H33"

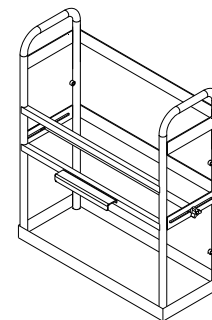

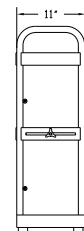

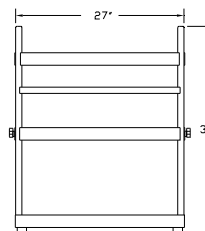

The Mag Grip/Light Caddy comes in two sizes. The difference between the two is the width. The small Caddy was designed to carry 18 x 24 flags, while the large Caddy will carry 24 x 36 flags as well.

Both units can also carry small electrical stands and/or tripods. An adjustable separator keeps the stands away from the flags. There are two rubber bungees built into the Caddy to be used when tightening objects down.

If additional stands are required, you can use removable stand holders which attach to the outside of the Caddy.

Stand holders are available in quad, double and single format.

Caddy attaches to the middle horizontal bar of the nose and is easily removed. When standing by itself it uses four rubber feet to stand on.

Shipping Weight/Dims: 30 lbs. (L13" x W29" x H34")

Mag DIT HD Tent

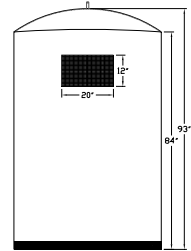

The MAG HD Tent has been a project in progress for the last two years. Backstage was asked to build a tent that would accomplish the following:

1. Adapt to a cart so it could be moved at the same time
2. Tent must be white on the outside to deflect heat and pitch black inside to see monitors in the middle of the day
3. Tent must be easy to assemble
4. Tent must be light weight and durable

- Water resistant
- Front door uses zipper for quick access
- Built -in velcro loops to hold door open
- Rear window with mesh and cover
- Built-in grommets to secure to sandbags
- Carabiners to hold down sandbags (4)
- Skirt is one piece, attaches to top with velcro
- Tent may be offset 30° for extra room
- Includes all necessary hardware
- Custom Bag to hold tent and hardware
- Attaches to cart by hooking up tent support shaft to an Umbrella Holder and a 5/8" Baby Pin (not included)

Mag Rain Tent

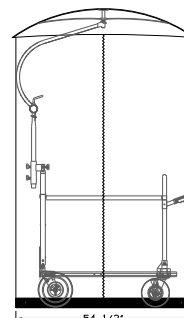

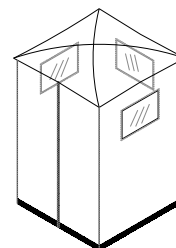

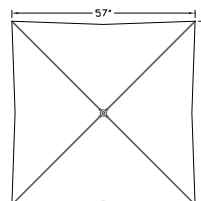

The Mag Rain Tent looks similar to the Mag HD Tent, but we have made some major modifications in order for this product to accomplish what is supposed to do. The main features include water proof top and sides, three large clear windows with covers to block light and double velcro to join top and sides securely. This tent may be used as an HD tent as well.

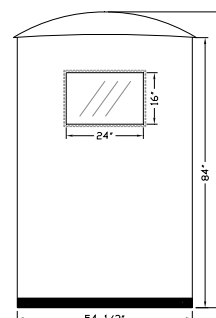

- Attaches to cart by hooking up tent support shaft to an Umbrella Holder and a 5/8" Baby Pin (not included)
- Moves along with cart
- Easy to assemble
- Light weight and durable
- Water proof
- Front door uses zipper for quick access
- Built -in velcro loops to hold door open
- Three windows with clear plastic and cover
- Built-in grommets to secure to sandbags
- Carabiners to hold down sandbags (4)
- Skirt is one piece, attaches to top with velcro
- Tent may be offset 30° for extra room
- Includes all necessary hardware
- Custom Bag to hold tent and hardware

Mag LCD LD Monitor Arm (Black)

The LCD Arms (HD, MD & LD) accommodate big LCD monitors and flat panel displays. You'll never twist a knob or push a lever. Simply float your plasma or LCD monitor with fingertip ease from one position to another. Tilt Head allows screen rotation from landscape to portrait mode and tilts back past 90 degrees or downward 44 degrees. Arm is easily removed from cart by loosening hand prong.

Mac VESA Mount Adapter Kit (17-24" iMac)

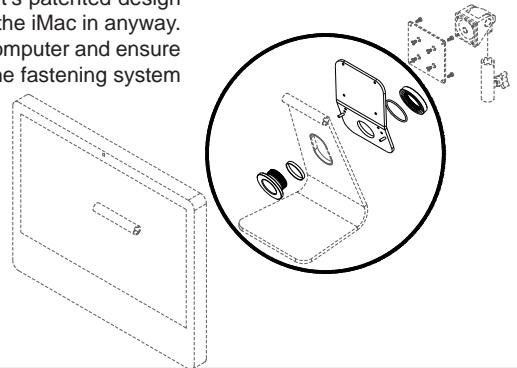

Mag I-Mac VESA Adapter with Tilt Head and 8" Tilt Head Pin Adapter mounted on C-Stand

The iMac Mount VESA Adapter Kit Provides a method for attaching Apple iMac all-in one desktop computers (17", 20" and 24") to VESA complaint mounting systems. The iMac Mount VESA adapter Kit's patented design integrates our unique fastening system, eliminating the need to remove the stand or modify the iMac in anyway. This allows for the VESA adapter Kit to maintain the integrity of the iMac as a true portable computer and ensure warranty is not voided due to disassembling or modification of the iMac. When mounted, the fastening system allows for the iMac to be dismantled quickly and easily for relocation or travel.
